### MaxiLabel™ BARCODE & GENERAL LABELING SOFTWARE

MaxiLabel Software is a drawing based software program. The advantage of this set-up is the maximum flexibility you have for designing labels. Create labels that contain: sectioned information including boxes and frames, imported graphics, logos, special fonts, various type sizes from 6 point up to 3 3/4" tall, vertical and horizontal print, alpha-numeric sequenced sections, bar codes and more! With the handy ODBC (open database connectivity) MaxiLabel can produce labels that contain your current database information. Overall, MaxiLabel Software is designed to produce wider or longer formatted labels that traditional labeling machines can't produce in less time and cost than other label producing methods.

### ProductSafety Label Making Software

The Windows® based software program is specifically designed for creating customized, ANSI compliant product safety labels and signs. Unlike other general labeling programs, PSL automates label design by containing specific product safety labeling elements like: ANSI signal words, safety specific pictographs, multi-lined text sections and bar codes. All elements can be added with a click of the mouse. Labels can be made in nearly any size and layout or use the pre-defined label templates for quick formatting. Before labels print, an ANSI Z535.4 regulation summary appears on-screen to help with design code compliance. Like all other MaxiSoft® software programs, PSL prints labels from standard office printers on maxisoft media. Maxisoft® Media is vinyl sheets with adhesive backing designed for making durable professional labels on-the-spot.

### **PipeMarker** LABELING SOFTWARE **V2™**

The MaxiSoft® Pipe Marking Solution is the most complete and professional marking system for pipes, conduit, utility cables, valves, hoses and tubes. PipeMarker V2™ allows you to choose from over 500 pre-formatted markers or create custom markers by combining text, warning headers, serialization numbers, flow arrows and more. Markers print using the K-Sun 9000XXL Thermal Transfer Printer and PolyDurable® Supplies with chemically matched resin printing ribbon. Markers are self-adhesive and aggressively adhere to a wide range of surfaces indoors and outside. With PipeMarker V2™, the K-Sun 9000XXL Thermal Transfer Printer and PolyDurable® Printing Supplies, you have the most flexible and powerful in-house pipe marking solution.

### **Right-To-Know** CHEMICAL LABELING SOFTWARE **V2**

The MaxiSoft® RTKV2 HazCom Chemical Labeling Software Solution will let you customize your hazard communications to meet your specific needs. Use the software for designing chemical labels, gaining on-line access to over 160,000 MSDS and storing your MSDS sheets on your desktop computer. Use the MaxiSoft® Media RTK labels for printing high quality, durable labels with any inkjet or laser printer. Make your labels more durable with MaxiSoft® Lamination die cut overlams. For the most durable label on the market, use the RTKV2 software with the K-Sun 9000XXL and PolyDurable® with RTKV2 preprinted formats. Together, you have a system that can label all chemicals in your facility, accurately and consistently.

## **K-SUN**

The MaxiSoft® system gives you the best source for producing chemical labels in-house and on demand. The labels produced with the MaxiSoft® solution cost less than customized pre-printed labels from a catalog or vendor. Plus, you can print one at a time, or an entire batch. The labels you print can accurately reflect the MSDS information that is sometimes unique to your company or your facility.

Ultimately, the labels you make are accurate, legible and consistent which is the basis for an effective, comprehensive chemical labeling program.

The MaxiSoft® RTKV2 HazCom Chemical Labeling Software™ also has an additional MSDS Management Module that allows you to access thousands of MSDS Sheets online. Download only the ones you need to have in your facility and manage them using the software. You can easily update your MSDS sheets and print them for access any time. The online resource for MSDS Sheets is updated constantly, so you can be sure the MSDS Sheets you have are accurate. The MSDS Management comes in an English only version, or an English and French version.

MaxiSigns99 allows you to make your own customized and standard safety and facility signs in seconds. Select from over 2,000 pre-formatted ANSI and OSHA compliant signs or design your own. Customize sign headers, text and import your own graphics to make signs that fit your exact needs. Print signs using your standard ink jet or laser printer on MaxiSoft® Media. Many sign protection products are available to make signs suitable for indoor and outdoor use. In seconds, you can create the exact sign you need using MaxiSigns99 software, your desktop printer and MaxiSoft® Media—the ultimate sign making solution.
